

Table 1. Normal events in the 2-node network example

Reachable?	Delivered?	Cached?
True	True	True
True	False	False
False	False	True
False	False	Faise

Delivered?	Cached?	Reachable?	Probability	1 20
True	True	True	1.0	- F19. 51
False	False	True	0.5	
False	True	False	1.0	
True	False	True	0.5	

(a) Sub-model with respect to 'Reachable?'

Reachable?	Cached?	Delivered?	Probability]	
True	True	True	1.0]	
True	False	False	1.0	- Fig.	313
False	True	Faise	1.0		¥
False	Faise	Faise	1.0	J	:

(b) Sub-model with respect to 'Delivered?'

Reachable?	Delivered?	Cached?	Probability]	
True	True	True	1.0	-F19.3	Ċ
True	False	Faise	1.0		
False	False	True	0.5		: •
False	True	True	0.5	j	•

(c) Sub-model with respect to 'Cached?'

Reachab	le? Delivered?	· · · · · · · · · · · · · · · · · · ·	<u> </u>		
True		Cached?	Class	AMC	IAP
True	True	True	Normai	11 1	+
False	False	False	Normai	#:	0.03
	False	True	Normal	 	0.83
False	False	False	Normal	0 22	0.83
Truc	True	Faise	Abnormal	0.33	0.67
True	Faisc	True		0.33	0.17
False	True	True	Abnormal	0	0
Faise	True	False	Abnormal	0.33	0.17
		raise	Abnormal	0	0.33
